

Hydrokrat Pump Recommendation Report

Pump Model: DeltaBasic

Application: Pressure Boosting

Required Flow: 70 m³/hr

Required Head: 60 m

Pump Type: Booster System

Features:

- Multi-pump system
- Variable speed
- Commercial buildings

Recommended Pump: DeltaBasic Application: Pressure boosting in residential buildings, hospitals, office buildings, hotels, department stores, industry, etc. Flow Range: Up to 88 m³/h Head Range: Up to 134 m Features: - Fully automatic package pressure booster system - Available with two to three vertical high-pressure pumps - Cascade-controlled and variable speed designs for precise pressure control - Equipped with frequency inverter or PumpDrive variable speed system and KSB SuPremE motor - Automated with KSB BoosterCommand Pro for reliable operation - Operating temperature range 0°C to +60°C - Maximum pressure up to 16 bar Why Recommended: DeltaBasic meets the required flow of 70 m³/h and head of 60 m with ample margin, ensuring efficient and reliable pressure boosting. Its variable speed control and automation provide precise pressure management and energy efficiency, making it ideal for building services and industrial applications.
