

Hydrokrat Pump Recommendation Report

Pump Model: DeltaCompact

Application: Pressure Boosting

Required Flow: 70 m³/hr

Required Head: 60 m

Pump Type: Booster System

Features:

- Variable speed control
- Compact design
- Fully automatic

Recommended Pump: DeltaCompact Rp 1 / 1 1/2 Application: Pressure boosting in residential buildings, hospitals, office buildings, hotels, department stores, industry, etc. Flow Range: Up to 18 m³/h Head Range: Up to 55 m Features: - Fully automatic ready-to-connect single-pump or dual-pump pressure booster system - Variable speed system with PumpDrive and KSB SuPremE motor for electronic control - Suitable for domestic water supply, irrigation, service water, and rainwater harvesting Why Recommended: DeltaCompact is designed for pressure boosting with variable speed control ensuring stable supply pressure and energy efficiency. However, the requested flow of 70 m³/h and head of 60 m exceed DeltaCompact's maximum flow (18 m³/h) and head (55 m). For these requirements, a DeltaBasic system, which supports flows up to 88 m³/h and heads up to 134 m, would be a closer match.
